Workshop structure: Introduction to an archetypal view of reality, meditation, and discussion.

2017 offers a new opportunity to examine, to reframe and to choose what leads to greater happiness and well-being in our lives. We will look at what is happening astrologically in the sky at this moment in time and discuss healthy ways to participate in the creation of the lives we want to have.

Archetypal Astrology presents a way of looking to the world and co-creating with life. Our natal charts are a description of the way we are likely to process experience, a way to see more of who we really are and how to honor that. It gives us the option of becoming more conscious of how we relate and react/respond to reality itself - inner and outer. Once we become more conscious of our attitudes and their ripples into the world, we can choose to respond more skillfully, growing closer and closer to being wiser and healthier... growing closer and closer to being a whole person. This is an avenue open to everybody!
